The Metropolitan Water District of Southern California will be working on a major water pipeline project in your community. Metropolitan is relining the Second Lower Feeder, a critical pipeline in Southern California’s regional water system. This project is necessary to ensure that we can continue to provide reliable water supplies to our 26-member public agencies serving 19 million people. Construction is estimated to last until November 2019. The water supply to homes and businesses will not be impacted.
SeconD Lower Feeder Rehabilitation
