ENSURING RELIABLE WATER DELIVERIES

INFRASTRUCTURE IMPROVEMENT PROJECT IN YOUR COMMUNITY

ABOUT THE PROJECT

The Metropolitan Water District of Southern California, a regional water provider, has a construction project in your neighborhood. Improvements to the East Orange County Feeder Pipeline will ensure that we can continue to provide reliable water supplies to our 26 member agencies serving 19 million people.

The East Orange County Feeder originates at the Robert B. Diemer Water Treatment Plant in Yorba Linda. It extends south for 25 miles through the cities of Anaheim, Orange, Santa Ana, and Irvine.

The improvements to the pipeline will consist of replacing a valve and making electrical modifications necessary to supply the power to the valve. This work will require the pipeline to be dewatered and taken out of service for six days, requiring work to occur around the clock. After this work is completed, the work to restore the site will occur.

LOCATION

The project site is located just north of E. Santa Ana Canyon Road on N. Tustin Avenue.

SCHEDULE

Phase 1: Site preparation and construction will begin in early January 2020. All activities will take place during regular construction hours.

Phase 2: The pipeline will be out of service from January 21-26, 2020. Work will occur 24 hours around the clock. After this period, activities will return to regular construction hours and the site will be restored.

THE WATER SUPPLY TO HOMES AND BUSINESSES WILL NOT BE AFFECTED.
WHAT TO EXPECT

- Activities related to the project will occur in your neighborhood.
- You will notice construction equipment.
- You may hear associated noise from the equipment, generators, and other construction activity. To reduce noise, temporary sound walls will be placed around the property and construction activity. Work will occur both underground and in the street.
- Traffic and parking lanes will be impacted. There may be temporary “No Parking” signs. Availability of traffic lanes and driveways, at times, may be limited.
