ABOUT THE PROJECT

The Metropolitan Water District of Southern California, a regional water provider, has a construction project in your neighborhood. Improvements to the Greg Avenue Pump Station, key water infrastructure, will ensure that we can continue to provide reliable water supplies to our 26 member agencies serving 19 million people.

The pump station is over 50 years old and must be upgraded to continue to serve the area. This project includes improving the pump station by replacing the existing pumps, control building, and storage tanks; and by upgrading electrical, mechanical, and control equipment at the facility.

The project began in April 2019 and will continue until early 2021. Construction is on-schedule. In February, work on our regional water pipeline under the pump station is required. During this time, around-the-clock work is necessary to ensure water service is not affected.

LOCATION

The project site is Metropolitan's Greg Avenue Pump Station, located at 7554 Greg Avenue.

SCHEDULE

Work will occur around the clock starting February 2, 2020 through February 16, 2020.

Before and after this time, activities at Greg Avenue Pump Station will occur during regular city-approved construction hours. Work will occur on weekdays starting at 7 a.m. and occasionally, Saturdays at 8 a.m. The project is scheduled to be complete in early 2021.

THE WATER SUPPLY TO HOMES AND BUSINESSES WILL NOT BE AFFECTED.
WHAT TO EXPECT

- Activities will mostly occur within the project site.
- You may hear associated noise from the equipment and other construction activity. To reduce noise, sound blankets are installed around the property and construction activity.
- Sidewalks along Greg Avenue and San Fernando Road adjacent to the property may be closed for the duration of the project. Alternate routes will be provided.

For 24-hour work from February 2-16, 2020

- Most construction activity above ground will occur between 7 a.m. and 9 p.m. As much as possible, consideration will be made to keep most activity from 9 p.m. until 7 a.m. underground to reduce noise and impact to neighbors.
- You may notice lights during nighttime hours.
- You may notice additional staff and construction materials. A crew of 20-25 will be working onsite.

THE WATER SUPPLY TO HOMES AND BUSINESSES WILL NOT BE AFFECTED.
