

THE METROPOLITAN WATER DISTRICT
OF SOUTHERN CALIFORNIA

Date: August 14, 2018
To: Area Residents
From: Salvador Vazquez, Community Relations Manager
Subject: Update on Palos Verdes Reservoir Rehabilitation Project:
Extended Work Hours until 10 p.m. from 8/22 – 8/31

The Metropolitan Water District of Southern California (Metropolitan) is performing construction activities within 500 feet of your residence as part of the Palos Verdes Reservoir Rehabilitation Project. This reservoir is an important part of the region's water infrastructure and helps ensure that we can continue to provide reliable water supplies to our 26 member public agencies serving 19 million people. The project is now 85% complete and the reservoir is expected to be back in service in early 2019.

Some of the upcoming construction activities will require extended work hours. From August 22 until August 31, the contractor will be cleaning and coating pipes, valves, and other structures on the bottom and inside slopes of the reservoir. For the coating to set effectively, outside temperatures must be cool and descending. Therefore, the work will occur until 10 p.m.

All work will take place within the reservoir and will be handled by a small crew of 3-4 people. To reduce the impact to you, work in the areas towards the top of the reservoir will occur earlier in the evening to take advantage of daylight. When additional lighting is needed, the crew will work further inside the reservoir. To minimize noise, a whisper generator will be used for any necessary equipment. Odors from the coating material should not be noticeable near residences.

The water supply to your homes and/or businesses will not be affected. We will continue to minimize inconveniences to the extent possible and notify you of any future activities requiring extended hours. Thank you for your patience and understanding during this vital project. We appreciate your continued support.
