RE: BOARD ITEM 7-4/Support: Delta Funding

Dear Chairwoman Gray and Board Members:

Coalition Members

On behalf of Construction Industry Coalition on Water Quality (CICWQ), we are writing in strong support of Metropolitan funding of the state’s environmental review and planning process for the single-tunnel Delta conveyance project, our best source of reliable, high-quality and affordable water. The recommended funding share ensures the environmental review is advanced and necessary planning can proceed.

Building Industry Association of
Southern California

Metropolitan’s tradition of leadership and strong stewardship starts with good planning. Continued investment in the environmental review and planning process for an updated Delta conveyance system ensures this process, which is essential for future decision-making, moves forward in a timely fashion and avoids further costly delays for this critically important project.

Association

Nearly one-third of Southern California’s water supply comes from the Sierra Nevada. This resource provides the backbone water supply for about 29 million people statewide, millions of acres of farmland, Southern California’s \$1.6 trillion economy and our environment. Modernizing the aging system that delivers this water is vitally important. It will help ensure we are better prepared for the effects of climate change and earthquakes and bring greater resilience to the Delta waterways and its ecosystem.

This is not an either/or situation; it is a both/and situation. Southern California is working diligently to reduce its reliance on the Delta. The Delta conveyance project is one of many steps we must take to ensure the region’s water resiliency. Southern California is doing its part – actively diversifying its portfolio by developing local projects and investing in water efficiency. Still, the success of these local projects, including recycling projects, depends on a reliable supply of the higher quality water from Northern California.

Governor Newsom's Water Resilience Portfolio prioritizes a one-tunnel Delta conveyance system as essential to ensuring reliable water for generations to come. We continue to support efforts that advance this project because Southern California depends on the reliability the proposed Delta project will provide. With our largest and most affordable supply at risk, Metropolitan needs to provide funding now, ensuring the project continues to move forward with needed environmental planning and permitting work so that an informed decision on the project itself can be made in the future.

We urge Metropolitan's Board of Directors to help fund the environmental review and planning process for the project.

Thank you for your consideration.

Sincerely,

A handwritten signature in black ink that reads "Michael Lewis". The signature is written in a cursive, flowing style.

Construction Industry Coalition on Water Quality

CICWQ is an advocacy, education, and research 501(c)(6) non-profit group of trade associations representing builders and trade contractors, home builders, labor unions, landowners, and project developers. CICWQ membership is comprised of members of four construction and building industry trade associations in southern California: The Associated General Contractors of California, Building Industry Association of Southern California, Engineering Contractors Association, and Southern California Contractors Association, as well as the United Contractors located in San Ramon. Collectively, members of these associations build a significant portion of the transportation, public and private infrastructure, and commercial and residential land development projects in California.
